

## Ex.No.12: PHP Array Sort

### Aim

To create a php script which display the capital and country name from the given array in ascending order of the country name.

### Source Code

#### sorting.php

```
<html>

<body bgcolor="teal" text="white">

<?php

echo "<h1><b><u><center>SORTING THE ARRAY</center></u></b></h1><br>";

$countries=array("Sri Lanka"=>"Colombo","Japan"=>"Tokyo","UAE"=>"Abu Dhabi","Pakisthan"=>"Islamabad",
"India"=>"Delhi");

ksort($countries);

?>

<table><tr><th><h4>Country Name</h4></th><th><h4>Capital</h4></th></tr>

<?php

foreach($countries as $x => $x_val)

{

?>

<tr><td><?php echo $x; ?></td>

<td><?php echo $x_val; ?></td></tr>

<?php

}

?>

</body>

</html>
```

## Result

Thus the php script which display the capital and country name from the given array in ascending order of the country name was created successfully

## Output

<u>SORTING THE ARRAY</u>	
Country Name	Capital
India	Delhi
Japan	Tokyo
Pakistan	Islamabad
Sri Lanka	Colombo
UAE	Abu Dhabi
