<h1 style="text-align:center"><u>Ex.No: 7. Frames and Events</u></h1>

<u>Aim</u>

To write a javascript program to display the specification of an object in another frame on mouseover event.

<u>Source Code:</u>

<u>Mainframe.html</u>

```
<html>
        <frameset cols="20%,*">
                <frame src="objname.html" name="name1">
                <frame src="objdes.html" name="des">
        </frameset>
</html>
```

<u>objdes.html</u>

```
<html>
<body>
<p id="p1">
This page will show the description when you move over the Image....
</p>
</body>
</html>
```

<u>objname.html</u>

```
<html>
<body>
<center><h2>Objects</h2>
<img src="nature.jpg" height="100" width="100" onmouseover="description()" onmouseout="normal()">
```

```
<script>

function description()

{

parent.des.location="nature.html";

}

function normal()

{

parent.des.location="objdes.html";

}

</script>

</body>

</html>
```

nature.html

```
<html>

<body bgcolor="pink">

<center><h2>Nature</h2></center>

<p align="justify"><i>Nature provides us with clean air to breathe, clean  water to drink, give the sol to make our food, and gives us land to stay.  Nature provides us with fruits and vegetables to feed our hunger. It is our responsibility to balance the privilege that we are getting without disturbing it. Nature is very precious to us.</i></p>

</body>

</html>
```

Output

Objects

This page will show the description when you move over the Image....

Objects

Nature

Nature provides us with clean air to breathe, clean water to drink, give the sol to make our food, and gives us land to stay. Nature provides us with fruits and vegetables to feed our hunger. It is our responsibility to balance the privilege that we are getting without disturbing it. Nature is very precious to us.
